The Website system offers FFA site-users many page types to choose from when designing their chapter website. In order to help you choose the most appropriate page type, below is an explanation of each.
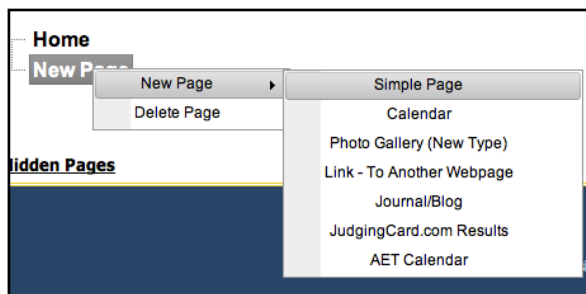

Simple Page: This page type is very basic. It provides a clean, white slate, similar to a Microsoft Word document, for the site administrator to add text, images, hyperlinks, tables, etc to.
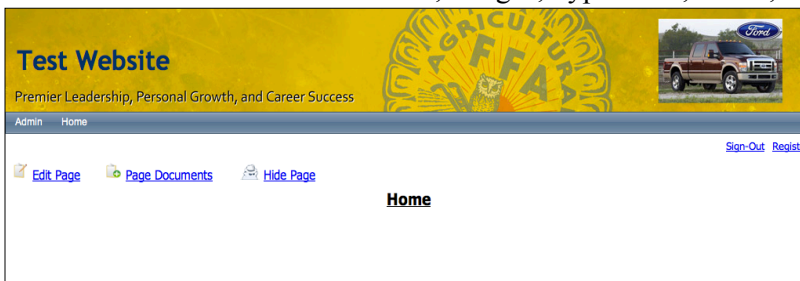

Calendar: This page type displays a large, interactive, month-view calendar to your web page. With the double-click of a mouse, the site administrator can easily add events for visitors to see.
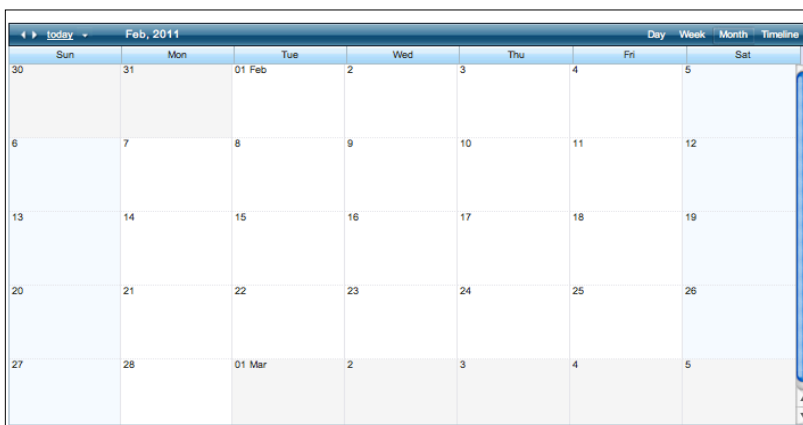

Photo Gallery: This page type allows the site administrator to add photo album(s) to your web page. There is no limit to the number of albums in your gallery, so show off as many FFA events as you can!

Link- To Another Webpage: This page type directly links another website to your web page. For example, if your page is titled "Texas FFA News," when a visitor clicks that title the menu, it will automatically bring them to the News website.

Journal/Blog: This page type allows the site administrator to make sequential entries, while automatically recording the time and date of the time posted.

JudgingCard.com Results: This page type displays Judging Card team results. Results are displayed by year.

Date	Event	Team Rank	Team Score
11/5/2010	**Sam Houston District (Area IX) LDEs** - Greenhand Quiz	15	15
6/11/2010	**Texas Consolidated Degree Check** - Degree Candidates: Lone Star	333	1
