

Embedding a Weather Box

Website System Tutorials

1. Open your website to the page you wish you embed your Weather Box in.
2. Click [Edit Page](#)
3. Go to www.weather.com
4. Enter the city and state you want the Weather box display.

Dallas, Texas FIND WEATHER

5. Click to generate the Weather box.

6. Click (located directly above the map). The following screen will appear.

7. Copy the information from the “Embed code:” box (as seen in black).
8. Go back to your website’s edit page.
9. Click [HTML](#) (located on the bottom blue banner) and paste the HTML code into the box.

11. To center-align your Weather box, click [Design](#) and use to make changes.
10. When finished, click [Save Changes](#)
